# LADDER-TRACK™ CONVEYOR BELTS

---

Ladder-Track™ belting is a simple but effective style of conveyor belt, commonly found in bakeries. Its open design provides efficient operation with minimum maintenance as well as facilitating easy and thorough cleaning. Ladder-Track™ is a positively sprocket driven belt which is used in straight running applications. Its light weight and basic configuration makes it a very economic and cost effective style of belting for many different environments.

## ADVANTAGES

- Flat, uniform surface for gentle product handling
- High tensile rods which resist permanent distortion and reduce down-time
- Positive-drive to ensure there are no tracking issues
- Smooth edges for easy movement around transfer
- Easy belt assembly and disassembly due to its simple open construction
