

# COMPACT-GRID<sup>®</sup> CONVEYOR BELT

OPEN MESH STAINLESS STEEL CONVEYOR BELTING WITH FLIGHTS

- Can easily replace many flighted plastic modular belts.
- Flight width and height are easily customized to accommodate many variations of products.
- The belt offers flights with multiple fastening sites to assure integrity through the process.
- Once in place, the fasteners can not be removed unless cut.
- Flights are designed with through-holes and side vents to allow hygienic drainage and drying after cleaning and sanitizing.
- Belt is USDA Accepted.
- No through rods or link barrels like plastic modular belting.
- Lighter weight alternative to metal modular conveyor belting.
- Proven in field testing to outlast most belts.
